VITAMINS & SUPPLEMENTS

PRODUCT CATALOGUE

Vitameen® - Your leading UK brand name in vitamins and supplements.

We are a successful family-owned company specializes in supplying high quality, low cost vitamins & supplements to independent pharmacies and small to medium sized chains.

Our operation allow us to supply single shops, right up to national chains with several hundred outlets. Our custom built production line allows us to pack in large quantities, which ideally suits our larger customers.

When it comes to nutritional supplements, nothing is more important than quality. That's why we craft our products in the UK with the finest ingredients, sourced from around the world, and guarantee strict quality analysis and safety tests to the highest pharmaceutical standards.

All our products are provided with Children Resistant Caps (CRC) Squeeze and Turn System, placing a great value on the qualification of our products accordance to the highest international requirements of BS EN ISO8317, and BS EN ISO14375.

TO OPEN SQUEEZE ENDS & TURN

PET ALUMINUM FOIL PAPER

Our bottled products are also sealed with PET aluminum foil paper liners for moisture barrier, long shelf life, freshness, and consumer safety as per USDA, FDA, and BSI requirements.

Vitameen®

Jointamine® Glucosamine, Chondroitin & MSM

Glucosamine and chondroitin sulfate are combined with sulfur-containing methylsulfonylmethane (MSM) to provide an enhanced spectrum of nutrients for optimal cartilage matrix composition, connective tissue strength, and joint comfort.

Uses For **Jointamine®**

Cartilage Composition: Glucosamine promotes the synthesis of the glycosaminoglycan chondroitin sulfate. Chondroitin sulfate is responsible for building the ground substance of cartilage, molecules known as proteoglycans. Studies have indicated that glucosamine has the ability to support healthy cartilage integrity, in part by maintaining healthy matrix metalloproteinase (MMP) enzyme activity. In addition, an important role of sulfur from MSM is to enhance the structure and integrity of proteoglycans.

Joint Motility and Function: Several studies indicate that the combination of glucosamine, chondroitin sulfate and MSM has positive effects on joint mobility function and comfort.

The Source

Glucosamine

Is derived from crab and shrimp.

Chondroitin sulfate

Is derived from bovine cartilage.

Methylsulfonylmethane (MSM)

Is synthetic. Ascorbyl palmitate is derived from corn dextrose fermentation and palm oil.

Recommendations

1-3 capsules per day, in divided doses, with meals.

Each Capsule Typically Provides

Glucosamine Sulphate 2KCl	575mg
Glucosamine Sulphate	430mg
Glucosamine	330mg
Chondroitin Sulphate	50mg
Methylsulphonylmethane (MSM)	50mg
